Experience

TEAM COMPUTERS

Web development Intern | July2025 – August 2025

- Gained hands-on experience in structuring projects with proper folder architecture and best practices.
- Developed a **full-stack Job Search Application** with features including:
- Job search with filters, application submission, and subscription options for users.
- Recruiter dashboard to post jobs and blogs, and track applicant statistics.

JARURAT CARE FOUNDATION

Web development Intern | September 2024 – January 2025

- Develop and maintain responsive, user-friendly, and visually appealing websites using Svelte.
- Collaborate with cross-functional teams to optimize website performance, user experience, and SEO.

Education

JC BOSE UNIVERSITY OF SCIENCE AND TECHNOLOGY, YMCA

Bachelor of Computer Applications (BCA) | 2023- 2026

Projects

I. Job Search App – Built with Next.js, MongoDB, and Node.js

I developed a full-stack **Job Search Application** that connects job seekers with recruiters, featuring authentication, job search, application tracking, and a chatbot for assistance.
The app enables users to:
✅ **Authentication** – Register and log in securely.
✅ **Job Seekers** – Search jobs with filters, apply for positions, read blogs, and subscribe for updates (email notifications handled via **Nodemailer**).
✅ **Recruiters** – Post jobs and blogs, and track how many applicants have applied to each job.
✅ **Chatbot Integration** – A built-in chatbot powered by **Grok API** to guide and assist users.
This project helped me practice and strengthen my skills in **full-stack development, email automation, API integration, and real-world job portal functionalities.**

- **Backend :-** https://github.com/priy-am/job-search-backend-

II. Chat App – Built with Next.js, Clerk, and GetStream

I developed a real-time chat application using Next.js, Clerk for authentication, and GetStream for messaging. The app enables users to:

✅ Authenticate with Clerk and manage their user profiles.
✅ Search for users and start a conversation.
✅ Send and receive real-time messages with a smooth and responsive UI.

This project was built as a practice exercise to strengthen my skills in authentication, real-time messaging, and full-stack Next.js development.
